

**Achievement Check- Area and Perimeter**

Below is a diagram of a new park. The park is to be fully fenced and sodded. Remember to use numbers, pictures and words to help you show your work.

- Calculate how much fencing will be required for this park.
- Calculate how much sod will be required for this park
- If one roll of sod covers  $6 \text{ m}^2$ , and each roll of sod costs \$12.65. How much will it cost for the sod including taxes?
